

Exp No :3 Creating a Risk Register

Aim

To create a Risk Register using Microsoft Excel for identifying, assessing, prioritizing, and managing organizational risks.

Procedure

1. Open Microsoft Excel and create a new workbook.
2. Create columns for Risk ID, Risk Description, Asset/Process, Risk Category, Likelihood, Impact, Risk Score, Risk Level, Controls, Treatment, Owner, and Status.
3. Enter sample organizational risks and their details.
4. Calculate the Risk Score = Likelihood × Impact.
5. Classify risks as Low, Medium, or High based on their score.
6. Add suitable risk treatments, owners, and status for each risk.

Output

Risk register

Risk ID	Risk Description	Asset/Process	Risk Category	Likelihood	Impact	Risk Score	Risk Level	Existing Controls	Risk Treatment	Risk Owner	Target Date	Status
R-001	Unauthorized access to systems	User Accounts	Access Control	4	5	20 High	High	Strong password policy and access controls	Implement MFA and periodic access reviews	IT Administrator	2024-03-31	Open
R-002	Malware infection	Endpoints	Cybersecurity	3	5	15 High	High	Antivirus and endpoint protection	Regular updates and patching	Security Team	2024-06-30	Open
R-003	Data loss due to backup failure	Database	Data Protection	2	5	10 High	High	Scheduled backups	Test backup integrity and recovery process	Database Administrator	2024-09-30	Open
R-004	Phishing attack	Email System	Social Engineering	4	4	16 High	High	Email filtering	Conduct awareness training and phishing simulations	Security Team	2024-12-31	Open
R-005	Unauthorized software vulnerability	Servers	Vulnerability Management	4	4	16 High	High	Patch management process	Monitor regular scans and timely patching	System Administrator	2024-07-15	Open
R-006	Insider threat/denial of service (DoS)	Web Server	Web Security	3	5	15 High	High	Access permissions and monitoring	Implement Web Application Firewall (WAF)	Network Administrator	2024-08-31	Open
R-007	Denial of service attack	Web Application	Network Security	3	4	12 Medium	Medium	Firewall and network monitoring	Deploy DDoS protection and traffic monitoring	Network Administrator	2024-11-15	In Progress
R-008	Excluded access of privileged accounts	Admin accounts	Cloud Security	3	5	15 High	High	Role-based access control	Implement privileged access monitoring and rotation	Security Manager	2024-10-31	Open
R-009	Physical theft of equipment	Laptops/Devices	Physical Security	2	4	8 Medium	Medium	Device lock and inventory tracking	Install device encryption and improve physical security	IT Administrator	2024-11-30	Open
R-010	Cloud service outage	Cloud infrastructure	Availability	3	4	12 Medium	Medium	Service monitoring and backup	Create backup and disaster recovery procedures	Cloud Administrator	2024-12-31	Open

Risk Scoring guide

Risk Score	Risk Level	Action
1-7	Low	Monitor and manage through routine controls
8-14	Medium	Additional treatment or monitoring may be required
15-25	High	Priority treatment and management attention required

Result

A Risk Register was successfully created in Excel containing identified risks, risk scores, risk levels, existing controls, treatment plans, risk owners, and status.
